ABSTRACT

Compiled to provide Moorpark College (MC) faculty, administrators, and staff with accurate, up-to-date information on MC students and faculty and the community which MC serves, this fact book contains data tables and graphs showing demographic and academic characteristics of students, faculty characteristics, public school enrollment data, and community ethnicity. Part I presents student data, including: (1) a student profile by educational goal, major, number of units completed, age, ethnicity, and residence; (2) student placement test results in math, reading, and English; (3) distribution of first-time students from local high schools; (4) a profile of high school students attending the MC Senior Day program; (5) data on student transfers to the University of California, California State University, and independent colleges; (6) enrollment trends between fall 1976 and fall 1990, by day/evening and part-/full-time status; and (7) statistical results by program from a classroom survey of students in 21 vocational programs. Part II contains faculty data, including information on the age, ethnicity, department, and gender of full-time faculty; and on the department and gender of part-time faculty. Part III examines community data, including statistics on public school enrollments for 1981-82 and 1989-90; 7th through 9th grade and 10th through 12th grade enrollment for 1978 to 1988; and high school senior enrollment figures for 1980, 1984, and 1988. In addition, population figures, including an ethnic breakdown, are projected for 1970 to 1994. (JMC)

MC Senior Day* Student Profile - 1990

*The Senior Day program is the process of assessment (at the various high school locations), campus visitations for orientations, and early-enrollment opportunity for high school seniors. These are students who have identified themselves as desiring to attend (now or in the future) Moorpark College as their first-choice for higher education. Senior Day takes place late in the Spring semester.

Moorpark College - Vocational Education
Classroom Survey Descriptive Statistics - 1990
Summary Graphs

The frequency distributions on the following pages refer to the occupational program identified on each page. "Total Responses" is the number of students associated with this occupational program during the classroom survey. Students are associated with an occupational program by either course enrollment or educational objective. The "Percent" is derived by dividing the number of students responding to the items. This is not the complete summary of responses, only those most frequently requested. Contact the Dean of Vocational Education for further information on vocational students' demographics, educational preferences, purposes for attending, employment status, etc.
